#### E.4 WINNING OF GAMES: GOALS

(a) The team that scores the most goals, including goals awarded on handicap and/or by penalty, wins the game.

(b) A goal is scored from play when the ball passes between the goal posts or the imaginary vertical line produced by the inner surfaces of the goal posts and across and clear of the goal line. The ball must go all of the way over and across the goal line to be a goal. A ball on the line is still in play. A ball hit directly over the top of either goal post shall not count as a goal because it does not pass between the inner vertical lines produced.

(c) Tournaments may be played in whole or part as a league, with 3 or more teams. If so, a points system, 2 for a win, 1 for a tie, should be used; there will be no extra chukkers in the event of a tie. If 2 teams tie, the "who beat who" rule will operate, but if 3 or more teams tie, the points system will be recalculated only to take into account the matches between the tied teams. If this results in 2 teams still being tied, then the "who beat who" rule will apply. If, however, 3 or more teams remain tied on points, the order of merit is established using the total of net goals accredited to each team (i.e. the sum of goals scored minus the sum of goals against, both including those received on handicap), counting only the matches between the tied teams. Should teams still be tied on net goals, then the difference in gross goals determines the order of merit. If teams still remain tied then the host club's Tournament Committee shall determine the winner by (a) a play off, (b) other equitable test or (c) toss of a coin.

(d) No objection may be lodged after the game on a decision made during the game as to whether a goal was scored or not, or whether the recording of goals was accurate or not.
